IN THE CLAIMS

Please add new Claims 50 and 51 as follows:

50. (New) An optical dispersion measurement apparatus comprising:

first means for generating monochromatic light;

second means for extracting two parts from said monochromatic light;

third means for directing the two parts of light onto a common optical path,

incorporating an optical modulator and a device under test and traversing said optical

modulator and said device on said common optical path in opposite directions;

fourth means for combining the two parts of light using said second means to obtain a
